7:00 pm Colorado Cattlemens Ag. Land Trust — “Agricultural Conservation Easements: Aiding in the transfer of Intergenerational ranches”

Join us for live Entertainment by:  
“Big Ronnie and the Circuit Breakers”

# Welcome to Farm Show

Sponsored by  
the Irrigation Research Foundation

Beneath the ground you’re walking on is the Ogallala Aquifer. It stretches for 10,000 square miles from Texas to the Dakotas, and is a major source of water for the High Plains. Unfortunately its water is being used faster than it is being replenished, and the result is predicted by many to be serious eco-centric pressure on the area in the not so distant future. ©

The Mission Statement of the Irrigation Research Foundation holds the above statement very close.

***“The Irrigation Research Foundation is committed to the conservation of the quality and quantity of the Ogallala Aquifer, its food production and the enhancement of the socio-economic welfare of the region”.***

The IRF provides Research Cooperators an opportunity to develop extensive studies on a variety of soil types, water and fertilizer application, hybrid seeds of various crops and low energy costs to produce maximum amount of net income per acre. We also conduct studies on strip-till farming on irrigated acres and limited water studies on crops.

Amidst all the trials and demonstrations we put in some excitement and fun, with free BBQ lunches both days, Join us in the evening for the Steak Fry followed by our own local band “Big Ronnie and the Circuit Breakers”

# Schedule of Events Thursday August 18th

7:30 – 9 am Breakfast—**Yuma Cheerleaders**

9 am – 3 pm **Exhibits Open**

9:15 am Earth Tec Solutions - David Langford  
“Putting your irrigation dollars to work for you.”
