IRF SPECIAL DISCLOSURE:

Due to what we believe to be a lightning strike on the Lateral early in the season, causing a reboot and reset of the system to factory settings, the amount of actual applied water was much less than the programmed applied water, resulting in a 'less than satisfactory' yield.

The applied water on this results page is the actual applied water to this project.

Weather, daytime temperatures and other factors affect data results, as in any year.

The Irrigation Research Foundation strives to record and control these factors where possible.

Not all of these factors are measurable or recognized.
